

Making memories to build memory through:

We will host a show exhibiting a range of different modes of transport which are used for different purposes.

DT

We will investigate what features make a good car in order to design our own. Using our designs we will then make these cars. This will develop our woodwork skills to make the chassis and creativity to decorate the exterior of the vehicle.

History

We will learn about historical modes of transport and the progression of transport throughout the ages by creating our own transport timeline. Also, we will create fact files, through conducting our own research, on different modes of transportation over the years.

Science

We will be learning about forces, including pushes, pulls and friction. We will apply this knowledge to improving safety in our local area.

English

We will be inspired by the classic cartoon 'Wacky Races' to write adventure stories.

We will also use the film Taking Flight as a starting point for English work including narrative, description, poetry diaries and dialogue.

Computing

We will develop our knowledge of coding and programming using LEGO Spike. We will create different modes of transport such as a taxi, helicopter and ferry which when coded will perform different operations.

French

We will learn how to greet people at various times of the day, as well as how to ask and answer questions relating to our names and how we are feeling.

RE

What do Christians learn from the Creation Story?

Top Gear

PSHE

We will learn how to manage our relationships online and keep ourselves and others safe online.

Music

We will use car show theme tunes as inspiration for making music about cars. We will use keyboards. We will learn about riffs, rhythms and how to structure music.

PE We will be developing our Fundamental Movement Skills & Our Outdoor Adventurous Activities.
