

Useful Maths Websites and google searches, TV programmes and DVDs:

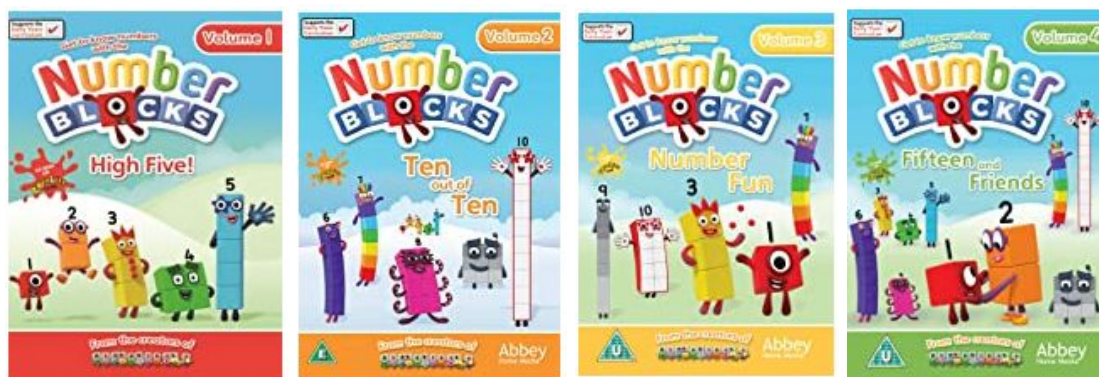

National Curriculum: [Mathematics Curriculum](#)

The **AMAZING NUMBERBLOCKS** series. It's not called 'The Amazing Numberblocks', but it should be. The DVDs support the teaching of Mastery better than any other DVD I have found.

Many episodes are on <https://www.bbc.co.uk/iplayer>. These, however, are removed from time to time. Watch it with your children, and get to know the characters. It *really* is amazing. You will not believe how much the children will learn from it.

Teachers at All Saints' use Numberblocks to support teaching, especially in years 1-3.

It is also available to buy on DVD.
